

Galvanized Wire

Our galvanized steel undergoes a hot-dip process in zinc for maximum corrosion resistance. Our wire is submitted to a thermal annealing process in order to improve ductility.

Stock dimensions:

- Gauge 10
- Gauge 12
- Gauge 14
- Gauge 16
- Gauge 18

Advantages:

It guarantees the user protection against corrosion. Excellent ductility allows our wire to be used efficiently in downstream manufacturing.

Uses:

Raw material for the production of barbed wire, staples and roofing nails.

- Guide for electric installations
- Tension for the installation of chainlink fencing
- Agriculture
- To moor cofferdams in constructions
- Domestic use

Packing:

- Rolls of 50 pounds
- Packs of 50 rolls of 1 pound (gauge 16 and 18)
